BCM Pound Projects update

Thank you for your contribution this month. This month we donated a tube well to a community that does not have access to clean drinking water in Bangladesh. Water is the source of life and the most precious of commodities – giving access to water sanitation saves lives. Access to safe drinking water can transform lives. The gift of a tube well will ensure that up to 4 families have access to clean water for drinking, washing and cooking.

Tube wells are manually operated and can lift water from about 30 metres beneath the ground. They are designed to last at least 10 years and can be easily maintained by the beneficiary.

The wells are located in convenient locations, often between a cluster of houses to gain maximum benefit for maximum people.

A well can take up to 6-9 months to complete, but Insha'Allah it will be sooner than this, as in some locations they can only be constructed during certain times of the year so we may not get immediate feedback. We will endeavour Insha'Allah to keep you informed about the progress of our well. On completion we will receive a letter or a report with photographs, which we will be sure to share with you. Jzk once again for your contribution towards this project.

We hope in the near future to donate another water well in another part of the world. Your continued support is much appreciated, as always.

We also appreciate your continued support in sharing our work with family and friends and promoting the work of BCM.
